-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 2-19,25-27 and 20-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berney, WO 89/08264, WO 96/08433 or WO 99/03585.

Berney, WO 89/08264, WO 96/08433 and WO 99/03585 all teach sample tube assemblies similar to that claimed comprising a tube portion with a ridged bottom portion, an end cap and a label chamber between the bottom of the tube and the cap where the label is an electronic or magnetic label. These references are silent to the claimed optically readable code.

Betts et al. teaches in column 6 lines 34+ teach the equivalence of an optically readable label and other labels such as electronic/magnetic labels. Optically readable labels such as bar codes have advantages over electronic label because they are easier and less expensive to manufacture. Bar code labels are made by conventional PC's and printers and can be easily made by the technician or layperson. This permits easy and inexpensive manufacture of the labels. The bar code labels can also be readily replaced by the technician or layperson without the need for specialized equipment (e.g. a convention PC and printer).

It would have been within the skill of the art to modify Berney, WO 89/08264, WO 96/08433 or WO 99/03585 in view of Betts et al. and use a bar code label to gain the above advantages.
